Map of Customers Count and Total Payments: where are the most profitable customers

Revenue, Rentals and Categories: Where to invest the most?

Relations between Rentals, Revenues and Film Categories

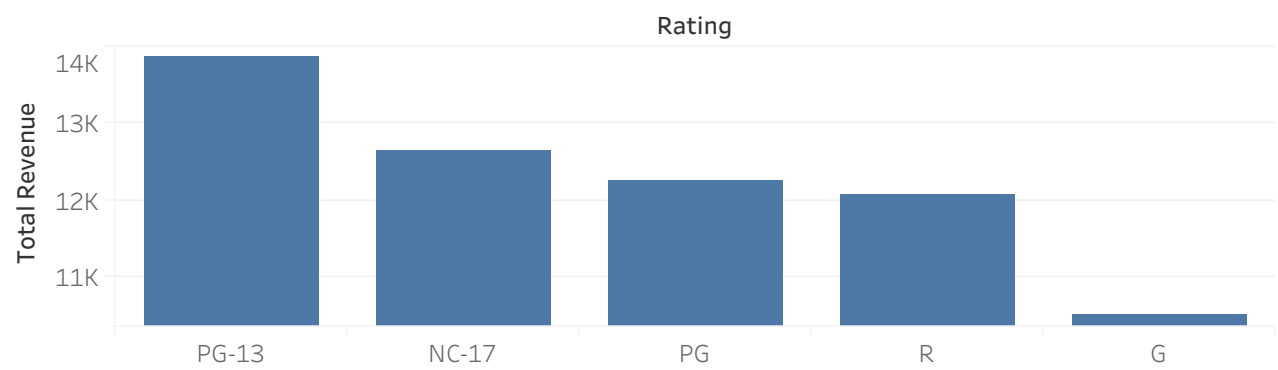

The most rented and profitable categories are Sports, Animation, Sci-Fi and Action.

PG-13 and NC-17 are the most profitable ratings.

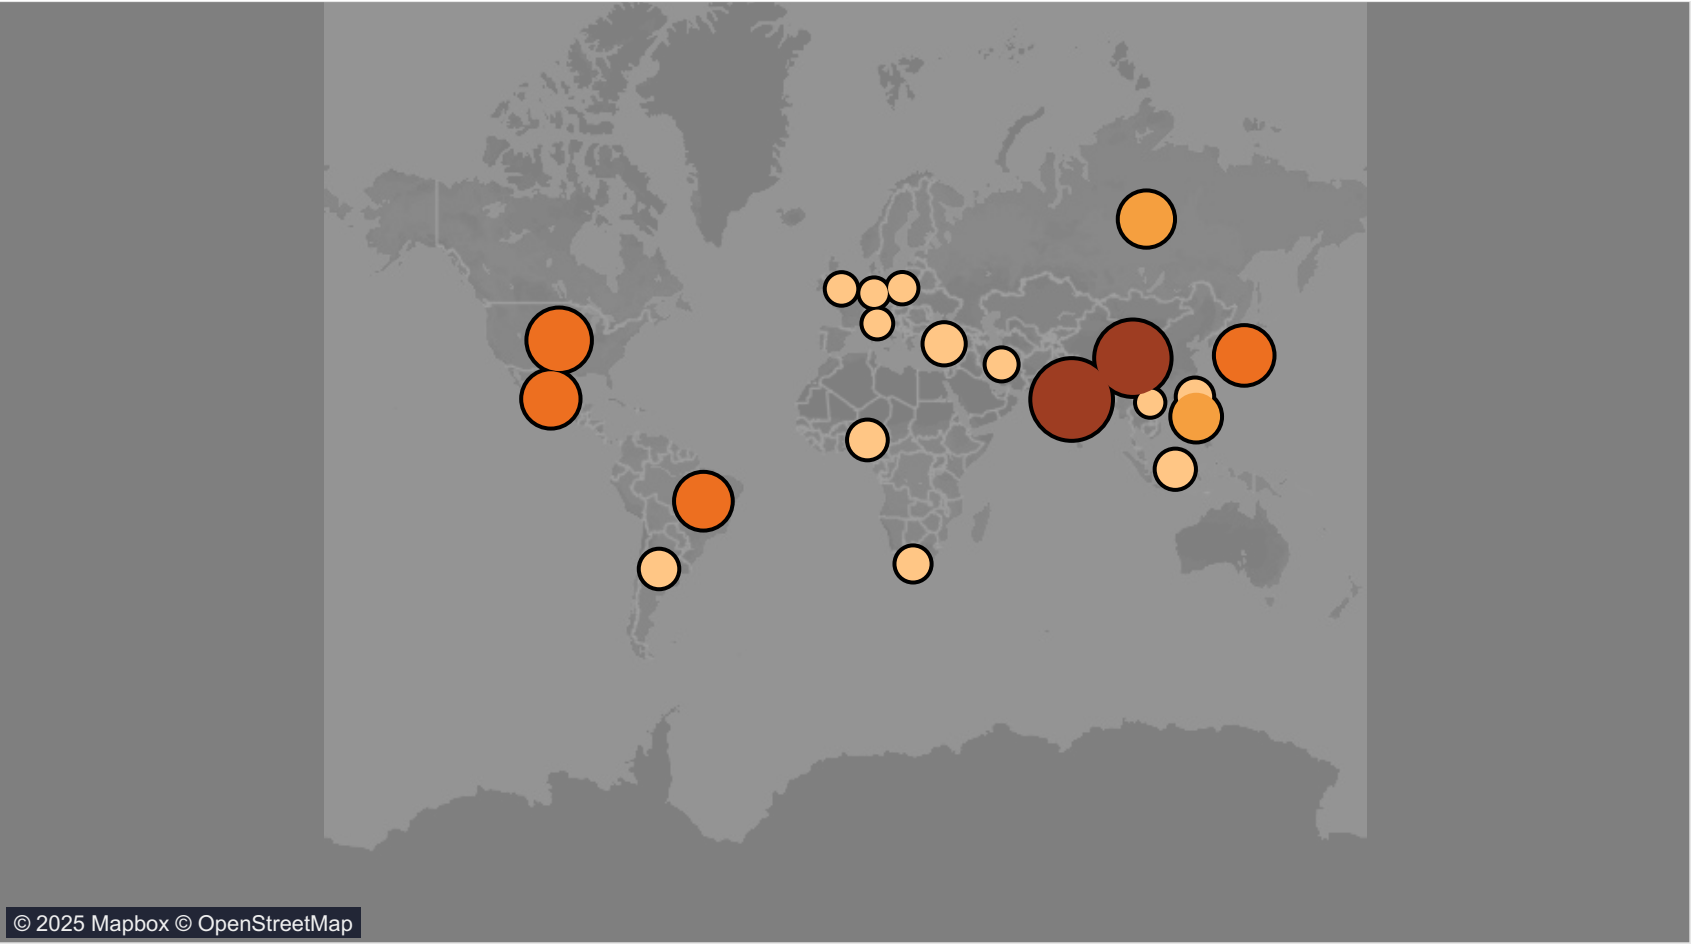

Investment in those will give the best odds of high revenue and popularity.

Revenue and Ratings

Countries, Payments, Customers: where's the favorable niche?

China and India are currently the strongest markets in both customer base and revenue. However, the orange cluster highlights countries with high potential for growth. These markets show clear interest and could rival India and China with targeted efforts. I recommend the marketing team prioritize these countries for customer acquisition and expansion.

Insights and Recommendations

MARKETING CAMPAIGNS

India, China, the USA and Japan are the strongest markets. Investment in them will maintain and gain new customers. There are other promising countries, like Turkey, Taiwan and the Philippines, in which marketing efforts will contribute for customer acquisition.

MOVIE INVESTMENTS

Preferences lie in the Categories of Sports, Animation and Sci-Fi and in the Ratings of PG-13. Further investment in these is strongly recommended, since they hold the highest revenue.

RENTAL RATES

Adjusting rental rates for the lower cluster countries will work as an incentive for customers and will gain new ones.

LOYALTY BOUNTIES

Rewarding loyalty by offering users discounted rates or a free rental based on monthly expenditure and/or number of rentals.
